What is an **ideal** job?

Well, **in my opinion**, several factors make a job perfect and ideal such as a high and competitive salary, working hours, the workplace, a friendly and **supportive atmosphere**, the **employer** and the colleagues you work with and **above all** it is very important that you love and enjoy the job you are doing. For some people, the **relevance** to the **field** of education is also of high importance and makes a job ideal. In crowded cities like Tehran, a short **distance** between house and work is a **big plus point** so that you do not have to **commute** for hours every day.
